Toxicology 100 (1995) 255–256

TOXICOLOGY

Volume contents

Volume 100 (1995)

Comparison of tissue retention of aluminum and Ga-67: effects of iron status in rats (**Ga-67 is not an ideal marker for Al since it is more sensitive to variations in iron intake and status**)
J.L. Greger, M.M. Chang, G. MacNeil Radzanowski (Madison, WI) 1–9

Cephaloridine nephrotoxicity in diabetic rats: modulation by insulin treatment (**Cephaloridine nephrotoxicity is reduced by the diabetic state per se and not by streptozotocin**)
M.A. Valentovic, J.G. Ball (Huntington, WV) 11–16

The dose-dependent inhibition of rat renal translation elongation seen after in vivo cyclosporin A is not caused by cyclosporin metabolites (**Renal microsomes from treated rats were used**)
W.C. Buss, L.D. Bowers (Albuquerque, NM; Indianapolis, IN) 17–25

Effect of treatment with mercury chloride and lead acetate during the second stage of rapid postnatal brain growth on δ-aminolevulinic acid dehydratase (ALA-D) activity in brain, liver, kidney and blood of suckling rats (**In vitro, Pb was more potent an inhibitor of ALA-D than was Hg, whereas in vivo the opposite was true**)
J.B.T. Rocha, M.E. Pereira, T. Emanuelli, R.S. Christofari, D.O. Souza (Santa Maria, Porto Alegre, Brasil) 27–37

Toxicity of sulphur mustard in adult rat lung organ culture (**Changes found in the in vitro system resembled those found after in vivo exposure**)
T.W. Sawyer, P.E. Wilde, P. Rice, M.T. Weiss (Medicine Hat, Alberta; Salisbury, UK) 39–49

Mode of action of bolesatine, a cytotoxic glycoprotein from *Boletus satanas* Lenz. Mechanistic approaches (**Bolesatine causes increased hydrolysis of GTP and ATP**)
R. Ennamany, J.P. Lavergne, J.P. Reboud, G. Dirheimer, E.E. Creppy (Bordeaux, Lyon, Strasbourg, France) 51–55

The acute effect of lead acetate on glucocorticoid regulation of tyrosine aminotransferase in hepatoma cells (**Lead may act to increase the turnover of TAT**)
A.S. Heiman, L.E. Tonner (Tallahassee, FL) 57–68

The toxicity of the mutagen 'MX' and its analogue, mucochloric acid, to rainbow trout hepatocytes and gill epithelial cells and to *Daphnia magna* (**The compounds show low acute toxicities**)
B. Isomaa, T.H. Holmström, H. Lilius, R. Franzén, L. Kronberg (Turku/Åbo, Finland) 69–77

Effect of dimethyl sulfoxide on *N*-(3,5-dichlorophenyl)succinimide (NDPS) and NDPS metabolite nephrotoxicity (**DMSO attenuates NDPS renal toxicity, presumably by inhibition of its biotransformation to a toxic metabolite**)
G.O. Rankin, K.W. Beers, D.W. Nicoll, D.K. Anestis, J.G. Ball, M.A. Valentovic, P.I. Brown (Huntington, WV) 79–88

Cadmium-induced nephrotoxicity in rhesus monkeys (*Macaca mulatta*) in relation to protein calorie malnutrition (**Animals on an isocaloric but casein-free diet are more susceptible to 5 mg/kg cadmium daily given by gastric intubation for 24 weeks**)
R. Prasad, R. Nath (Chandigarh, India) 89–100

Impairment of testicular endocrine function after lead intoxication in the adult rat (**High daily doses for 1 month do not impair spermatogenesis but affect endocrine function**)
A. Thoreux-Manlay, J.F. Vélez de la Calle, M.F. Olivier, J.C. Soufir, R. Masse, G. Pinon-Lataillade (Fontenay-aux-Roses, Rennes, Le Kremlin-Bicètre, France) 101–109

Release of prostaglandin E_2 and leukotriene C_4/D_4 from airway segments isolated from rats after exposure to ozone for 20 months (**Challenged, but not basal release of prostaglandin was increased following chronic exposure to ozone**)
J.L. Szarek, M.A. Valentovic (Huntington, WV) 111–119

Altered enzyme activities of xenobiotic biotransformation in kidneys after subchronic administration of 3-chloro-4-(dichloromethyl)-5-hydroxy-2(5*H*)-furanone (MX) to rats (**Chronic administration of this water-derived mutagen in bacteria causes diverse changes in drug metabolic enzymes**)
K. Heiskanen, P. Lindström-Seppä, L. Haataja, S.-L. Vaittinen, T. Vartiainen, H. Komulainen (Kuopio, Finland) 121–128

A protein kinase C inhibitor attenuates cyanide toxicity in vivo (**In the pig brain, a protein kinase C inhibitor diminished cyanide-induced cellular energy depletion**)
E.U. Maduh, E.W. Nealley, H. Song, P.C. Wang, S.I. Baskin (Aberdeen Proving Ground, MD; Washington, DC) 129–137

Leukotrienes and α-naphthylisothiocyanate-induced liver injury (**Leukotrienes appear not to be a prerequisite for the expression of ANIT hepatotoxicity**)
M.B. Bailie, L.J. Dahm, M. Peters-Golden, R.R. Harris, G.W. Carter, R.A. Roth (East Lansing, Ann Arbor, MI; Abbott Park, IL) 139–149

Toxicity, metabolism and absorption of selenite by isolated rat hepatocytes (**Selenite uptake occurs by facilitated diffusion and is suppressed by sulfite**)
Y.-C. Park, P.D. Whanger (Corvallis, OR) 151–162

Effects of exposure to environmental tobacco smoke on a human tracheobronchial epithelial cell line (**Sidestream cigarette smoke is toxic to human airway epithelial cells**)
W. Sun, R. Wu, J.A. Last (Davis, CA) 163–174

Suicidal inactivation of haemoproteins by reductive metabolites of halomethanes: a structure-activity relationship study (**There are diversified actions on haemoglobin, methaemalbumin and cytochrome P-450**)
M. Manno, R. Tolando, R. Ferrara, M. Rezzadore, S. Cazzaro (Padova, Italy) 175–183

Persistent, specific and dose-dependent effects of toluene exposure on dopamine D_2 agonist binding in the rat caudate-putamen (**Long-term exposure causes persistent increases in the affinity for dopamine D_2 agonist binding**)
M. Hillefors-Berglund, Y. Liu, G. von Euler (Stockholm, Sweden) 185–194

The effects of *N*-(5-vinyl-1,3-thiazolidin-2-ylidene)phenylamine (5-VTPA) on the changes in free intracellular calcium and the production of reactive oxygen metabolites in human leukocytes (**This possible toxic contaminant of food oil increases both investigated parameters**)
K.M. Heiskanen, J. Naarala, K.M. Savolainen (Kuopio, Finland) 195–202

Immunotoxicology

The SCID-hu mouse as a tool in immunotoxicological risk assessment: effects of 2-acetyl-4(5)-tetrahydroxybutyl-imidazole (THI) and di-*n*-butyltin dichloride (DBTC) on the human thymus in SCID-hu mice (**THI, the immunotoxic component of Caramel colour III, and dibutyltin dichloride induced a reduced size of the thymic cortex in SCID-hu mice**)
C. de Heer, H.-J. Schuurman, G.F. Houben, R.H.H. Pieters, A.H. Penninks, H. van Loveren (Bilthoven, Zeist, Utrecht, The Netherlands; Basel, Switzerland) 203–211

TNF-α production as an in vitro assay predictive of cytokine-mediated toxic reactions induced by monoclonal antibodies (**A simple in vitro assay for TNF-α production is proposed as a tool to predict acute reactions induced by monoclonal antibodies**)
E. Robinet, P. Morel, O. Assossou, J.-P. Revillard (Lyon, France) 213–223

Toxicology information and resources

Toxicology databases in the metadatabank of online databases
K. Voigt, R. Brüggemann (Neuherberg, Germany) 225–240

Contents of journals relating to toxicology 241–245
Author index 247
Subject index 249–253
Volume contents 255–256

(Contents continued from outside back cover)

Altered enzyme activities of xenobiotic biotransformation in kidneys after subchronic administration of 3-chloro-4-(dichloromethyl)-5-hydroxy-2(5*H*)-furanone (MX) to rats (**Chronic administration of this water-derived mutagen in bacteria causes diverse changes in drug metabolic enzymes**)
K. Heiskanen, P. Lindström-Seppä, L. Haataja, S.-L. Vaittinen, T. Vartiainen, H. Komulainen (Kuopio, Finland) 121–128

A protein kinase C inhibitor attenuates cyanide toxicity in vivo (**In the pig brain, a protein kinase C inhibitor diminished cyanide-induced cellular energy depletion**)
E.U. Maduh, E.W. Nealley, H. Song, P.C. Wang, S.I. Baskin (Aberdeen Proving Ground, MD; Washington, DC) 129–137

Leukotrienes and α-naphthylisothiocyanate-induced liver injury (**Leukotrienes appear not to be a prerequisite for the expression of ANIT hepatotoxicity**)
M.B. Bailie, L.J. Dahm, M. Peters-Golden, R.R. Harris, G.W. Carter, R.A. Roth (East Lansing, Ann Arbor, MI; Abbott Park, IL) 139–149

Toxicity, metabolism and absorption of selenite by isolated rat hepatocytes (**Selenite uptake occurs by facilitated diffusion and is suppressed by sulfite**)
Y.-C. Park, P.D. Whanger (Corvallis, OR) 151–162

Effects of exposure to environmental tobacco smoke on a human tracheobronchial epithelial cell line (**Sidestream cigarette smoke is toxic to human airway epithelial cells**)
W. Sun, R. Wu, J.A. Last (Davis, CA) 163–174

Suicidal inactivation of haemoproteins by reductive metabolites of halomethanes: a structure-activity relationship study (**There are diversified actions on haemoglobin, methaemalbumin and cytochrome P-450**)
M. Manno, R. Tolando, R. Ferrara, M. Rezzadore, S. Cazzaro (Padova, Italy) 175–183

Persistent, specific and dose-dependent effects of toluene exposure on dopamine D_2 agonist binding in the rat caudate-putamen (**Long-term exposure causes persistent increases in the affinity for dopamine D_2 agonist binding**)
M. Hillefors-Berglund, Y. Liu, G. von Euler (Stockholm, Sweden) 185–194

The effects of *N*-(5-vinyl-1,3-thiazolidin-2-ylidene)phenylamine (5-VTPA) on the changes in free intracellular calcium and the production of reactive oxygen metabolites in human leukocytes (**This possible toxic contaminant of food oil increases both investigated parameters**)
K.M. Heiskanen, J. Naarala, K.M. Savolainen (Kuopio, Finland) 195–202

Immunotoxicology

The SCID-hu mouse as a tool in immunotoxicological risk assessment: effects of 2-acetyl-4(5)-tetrahydroxybutyl-imidazole (THI) and di-*n*-butyltin dichloride (DBTC) on the human thymus in SCID-hu mice (**THI, the immunotoxic component of Caramel colour III, and dibutyltin dichloride induced a reduced size of the thymic cortex in SCID-hu mice**)
